COUPLES APP · FEATURE WALKTHROUGH

Us — how every feature works

A private space for two: chat, calls, photos, memories, plans, music, games, an encrypted vault, Premium and more.

This walkthrough explains each feature from the user's side — where to find it, how to use it — with real screens from the app and a short note on how it's built.

App: Us (Android · package com.nammaempire.together)
Stack: Flutter 3.44 · Firebase (Auth, Firestore, Storage, Cloud Functions) · Agora
Date: 23 October 2026 · 20 features

CONTENTS

What's inside

01 First launch: icon and splash
02 Sign up and create your profile
03 Pair with your partner

05 Chat
06 Clear chat and screenshot alerts
07 Voice and video calls
08 Chat theme, avatars and couple stickers
09 Memories
10 Calendar
11 Love notes
12 Plans
13 Music and Watch together
14 Play
15 Private vault
16 App lock and sign-in protection
17 Premium and gifts
18 Memory book
19 Ending a pairing
20 Us: settings and your relationship

Screens are rendered from the app's Flutter code with sample data for a couple, Asha and Ravi. Photos show as placeholders, and the live call, camera and QR screens need a real phone. Every chapter ends with a “Behind the scenes” line naming the Firestore data and code involved, for the development team.

FEATURE 01

First launch: icon and splash

📍 Phone home screen → tap Us

The app opens on a branded splash that follows the phone's light or dark mode, with “powered by RESET95” in the corner, while it signs in and loads the couple's space.

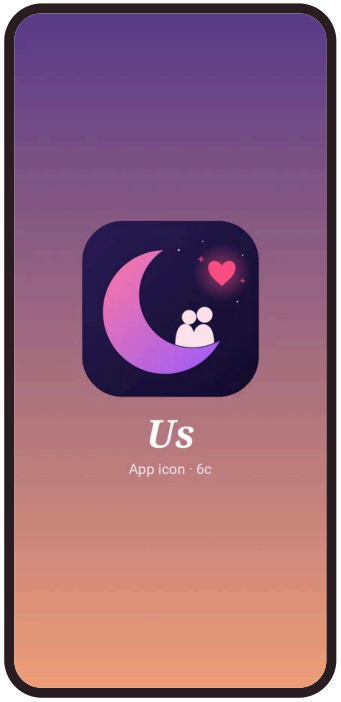

How to use it

1. Tap the Us icon (the couple on the crescent, watching the heart).
2. Android shows its own launch screen with the icon, then the app's splash with “Us — just the two of you”.
3. The app goes straight to sign-in, setup or Home depending on the account's state.

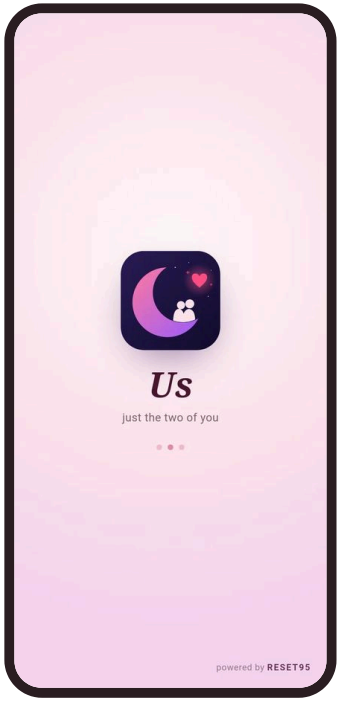

Good to know

- Android 13+ themed icons get a one-colour version automatically.
- On Android 12+ the very first moment is the system splash (icon only, no text).

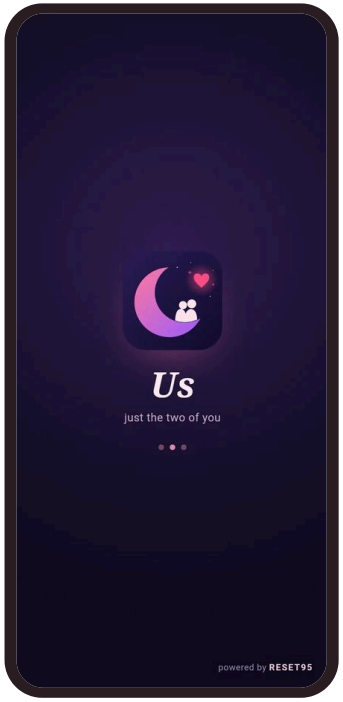

Behind the scenes: BrandSplash widget (lib/core/widgets/brand_splash.dart); native splash in res/values-v31 and launch_background.xml.

App icon

Splash, light

Splash, dark

FEATURE 02

Sign up and create your profile

📍 First screens after installing

A person creates an account with Google, email or their mobile number, then fills in a short profile.

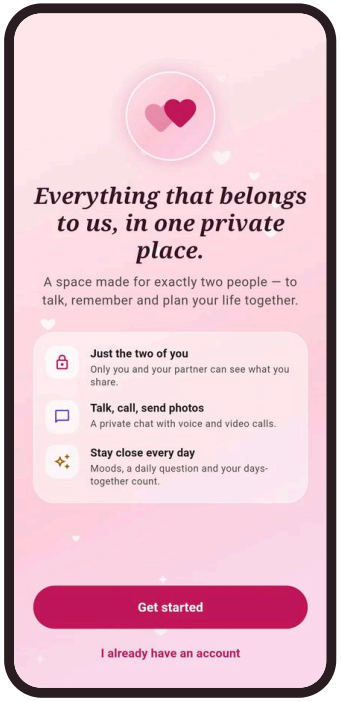

How to use it

1. Welcome → Get started.
2. Choose Continue with Google, email and password, or Continue with mobile number (SMS code).
3. About you: photo or avatar, name, nickname and birthday (step 1 of 3).

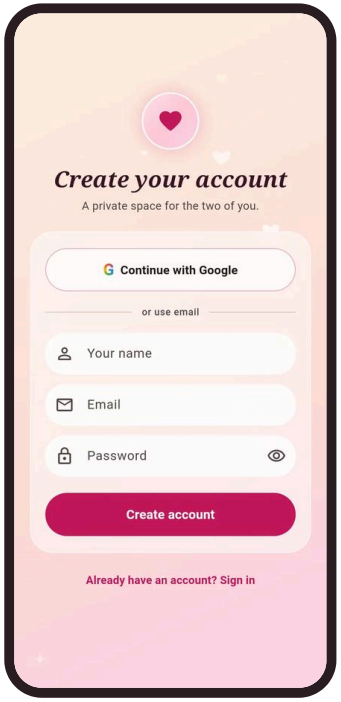

Good to know

- Returning users sign in; email accounts can reset their password.
- Mobile-number sign-in needs Firebase's Blaze plan and Play Integrity.

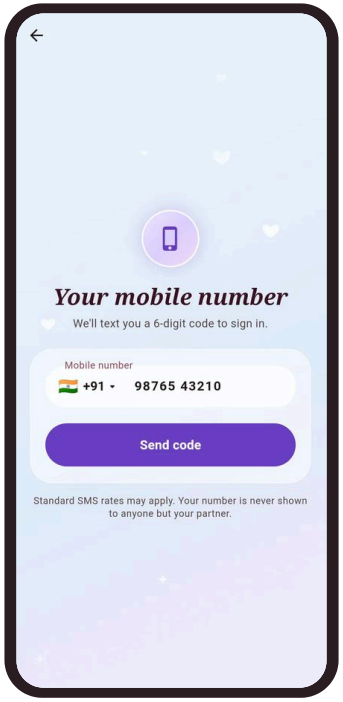

Behind the scenes: Firebase Auth (Google, email, phone OTP). Profile in users/{uid}.

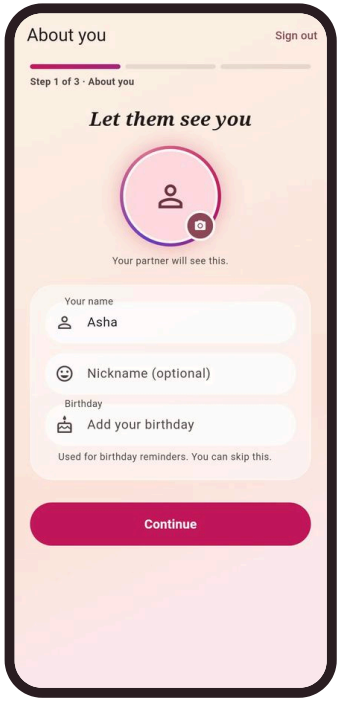

Welcome

Create account

Mobile number

About you

FEATURE 03

Pair with your partner

📍 Step 2 and 3 of setup

Two accounts join one private couple space. One person creates the space; the other joins with the invite code, a QR scan or their partner's mobile number.

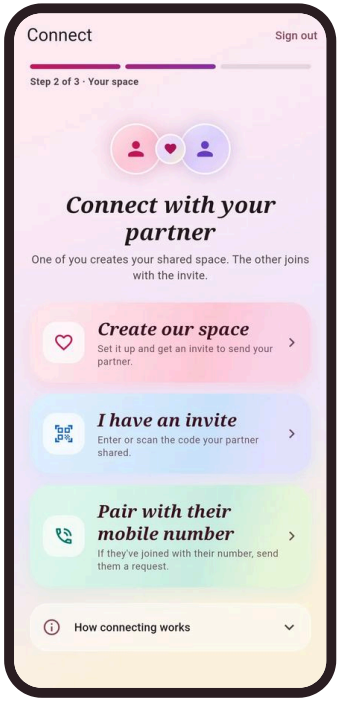

How to use it

1. Connect: Create our space, I have an invite, or Pair with their mobile number.
2. The creator shares the invite (QR, code or share sheet).
3. The partner joins; both see You're connected and a setup checklist (anniversary, birthday, notifications, privacy).

Good to know

- One couple per person; a pair request by number must be accepted.
- Ending a pairing has its own flow (see later chapter).

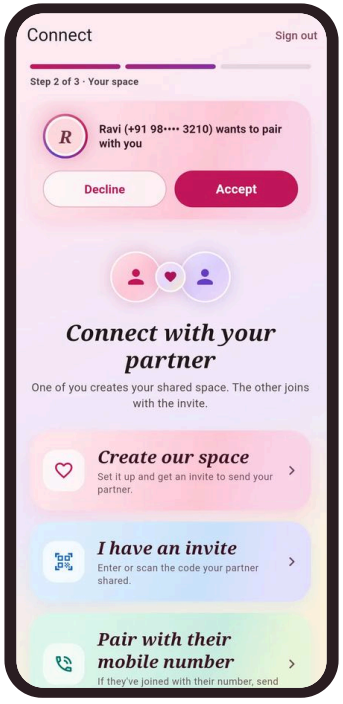

Behind the scenes: couples/{id} with memberIds and inviteCode; pairRequests/{id}; phoneIndex/{+E164}.

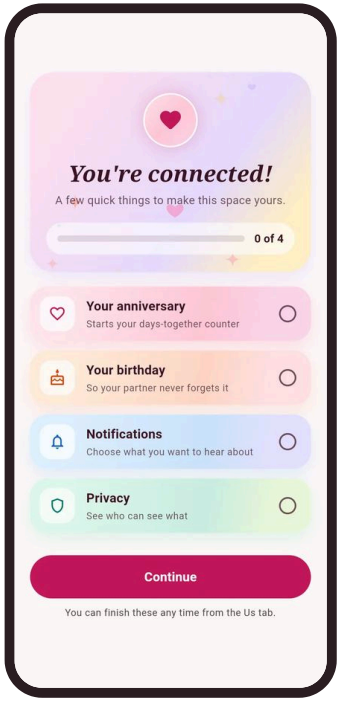

Connect

Invite your partner

Pair request by number

You're connected

FEATURE 04

Home

📍 Home tab

The daily landing screen: how long you've been together, quick ways to reach each other, what's coming up, moods and a daily question.

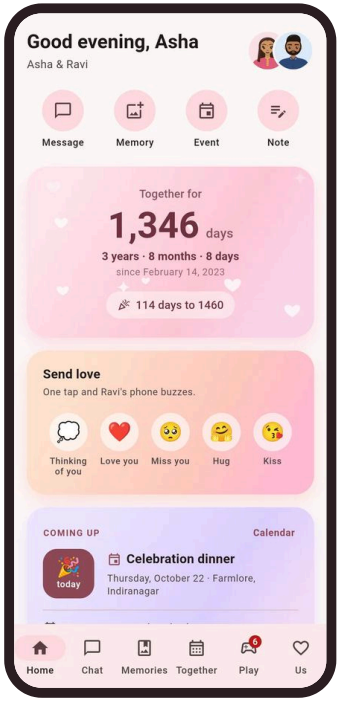

How to use it

1. See days together, with the next milestone.
2. Tap a love tap (Thinking of you, Love you, Miss you, Hug, Kiss) to buzz your partner.
3. Check Coming up (anniversary, birthdays, next meetup), set your mood, and answer the daily question — it unlocks once both have answered.

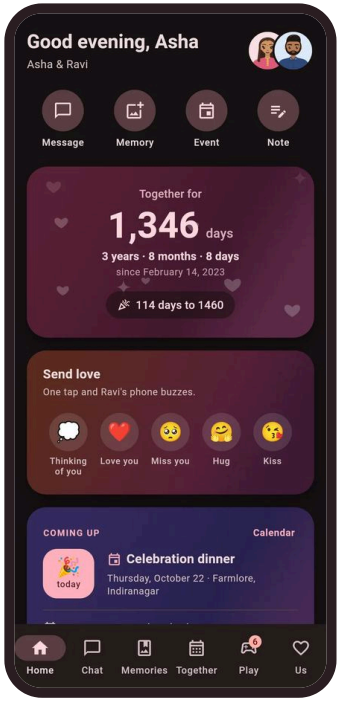

Good to know

- Quick actions: message, voice call, video call, dates.
- A streak appears from 2 days of daily questions.

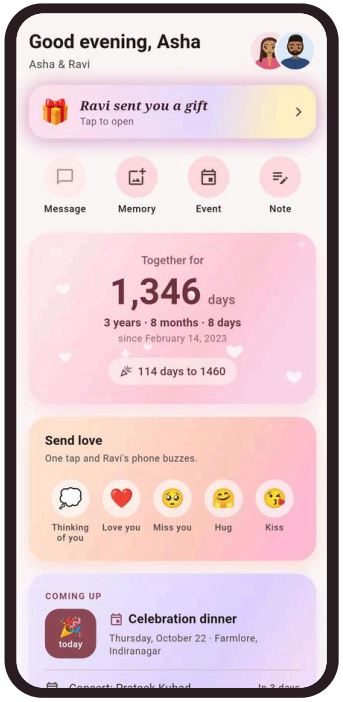

Behind the scenes: Home providers combine couple, events, moods and dailyQuestions.

Home

Home, dark

A gift waiting on Home

FEATURE 05

Chat

📍 Chat tab

The private conversation: text, photos, videos, voice notes, replies, reactions, pins and search.

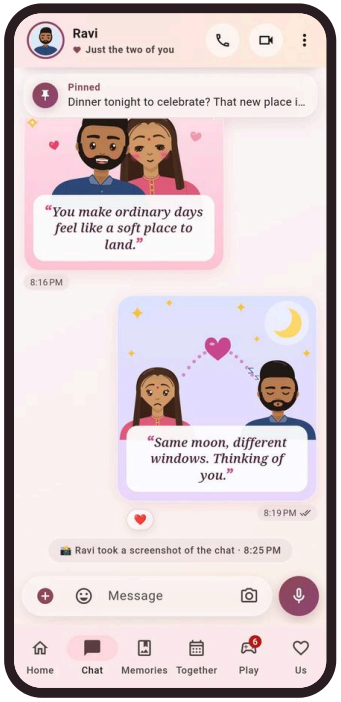

How to use it

1. Type, or tap + for photos and videos, or the mic for a voice note.
2. Swipe a message right to reply; long-press to react, copy, pin or delete.
3. Use ⋮ for search, photos & videos, pinned messages, chat theme, clear chat and screenshots.

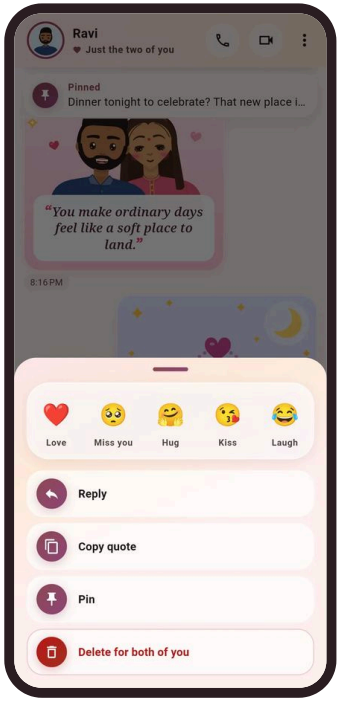

Good to know

- Delivered/seen ticks; seen only while the chat is on screen.
- Videos up to 3 minutes and 100 MB.

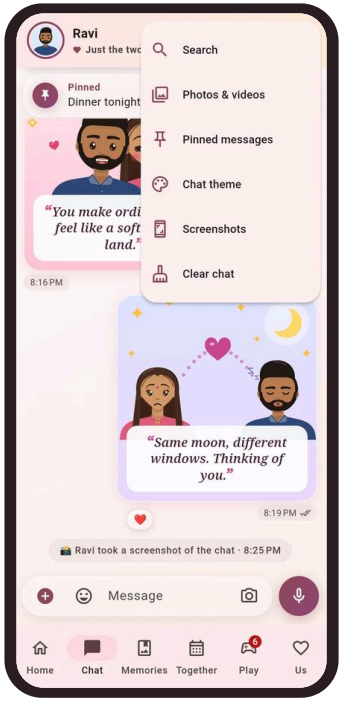

Behind the scenes: couples/{id}/messages; media in Storage under couples/{id}/.

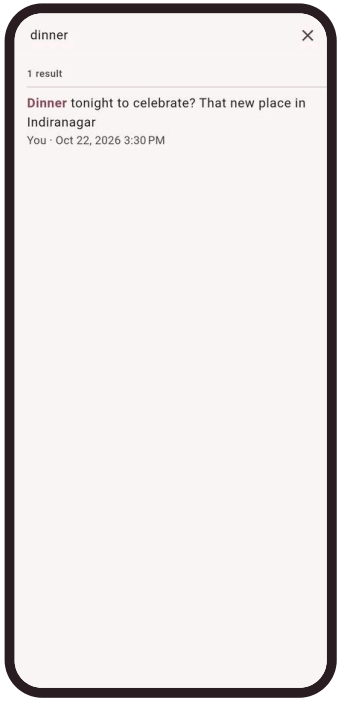

Chat

Message actions

Chat menu

Search

FEATURE 06

Clear chat and screenshot alerts

📍 Chat ⋮ → Clear chat / Screenshots

Either partner can clear the chat just for themselves or for both, and both are told when the other takes a screenshot of the chat.

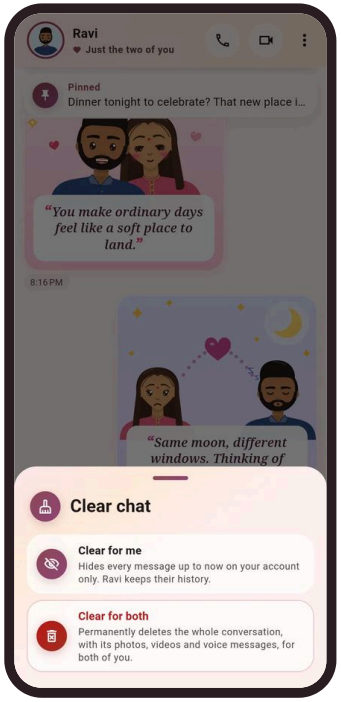

How to use it

1. Clear for me hides messages on your account only.
2. Clear for both deletes every message and its media for both of you, and posts a “cleared the chat” line.
3. Screenshots: a “📸 took a screenshot” line appears for both; optionally block screenshots of the chat for both phones.

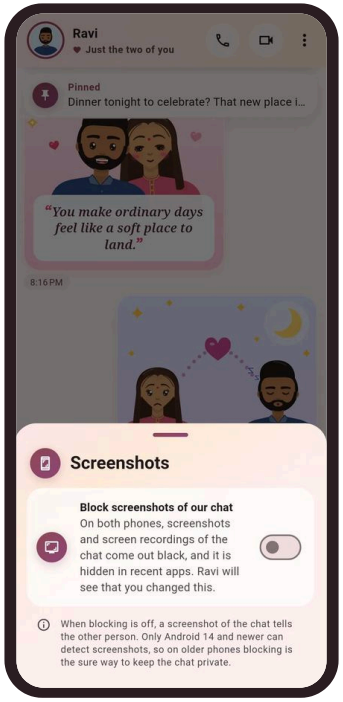

Good to know

- Screenshot detection works on Android 14 and newer; blocking works on every Android version.

Behind the scenes: users/{uid}.chatClearedAt, couples/{id}.chatClearedAt/blockScreenshots; ScreenPrivacy.kt.

Clear chat

Screenshots

FEATURE 07

Voice and video calls

📍 Home quick actions or the chat header

One-tap voice and video calls between partners.

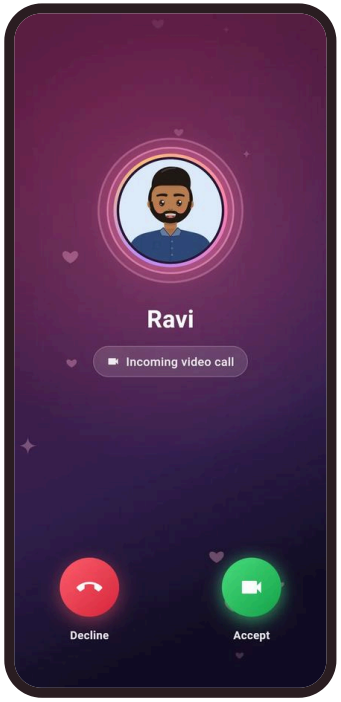

How to use it

1. Tap the phone or camera icon.
2. Your partner gets a full-screen ring with accept and decline.
3. Calls show in chat as completed (with duration), missed or declined.

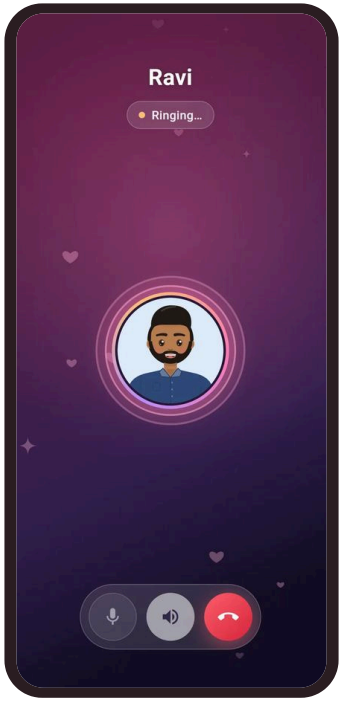

Good to know

- Unanswered calls stop after 45 seconds.
- Without push notifications, a call only rings while the partner's app is open (see the status report).

Behind the scenes: Agora RTC; call state in couples/{id}/call/current.

Incoming call

In a call

FEATURE 08

Chat theme, avatars and couple stickers

📍 Chat ⋮ → Chat theme · Us → Your avatar · Chat → smiley button

Make the chat yours: a colour and background, a cartoon avatar of each of you, and stickers of the two of you with a quote.

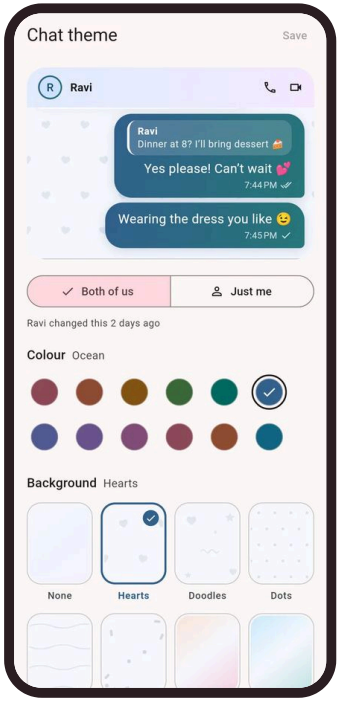

How to use it

1. Chat theme: pick a colour and a pattern or photo; choose Both of us or Just me.
2. Avatar: build a cartoon you (skin, face, hair, eyes, outfit…) and optionally use it as your profile picture.
3. Stickers: pick a category (Love, Missing you, Sorry…), a scene and a ready quote or your own words.

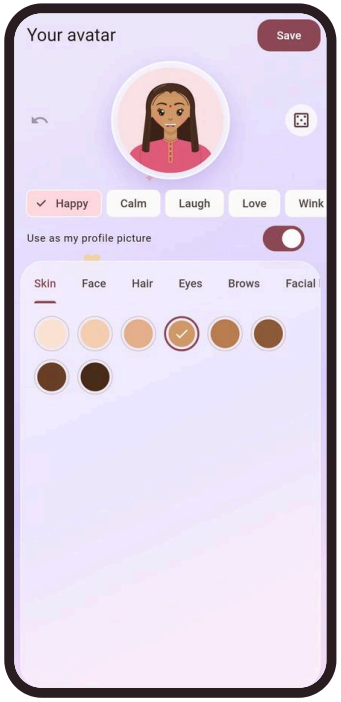

Good to know

- 35 scenes and 133 quotes; the sender is always on the left.

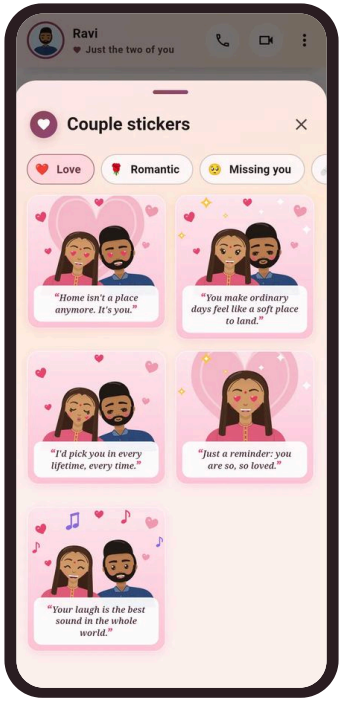

Behind the scenes: couples/{id}/settings/chatLook and users/{uid}.chatLook; users/{uid}.avatar; messages with type sticker.

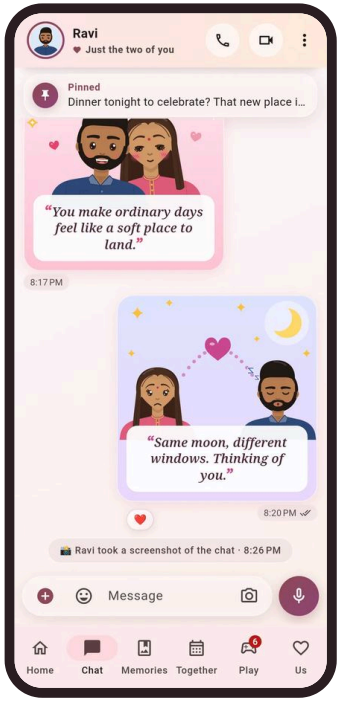

Chat theme

Avatar builder

Sticker picker

Stickers in chat

FEATURE 09

Memories

📍 Memories tab

A shared album of moments, organised by album and month, with “on this day” and recaps.

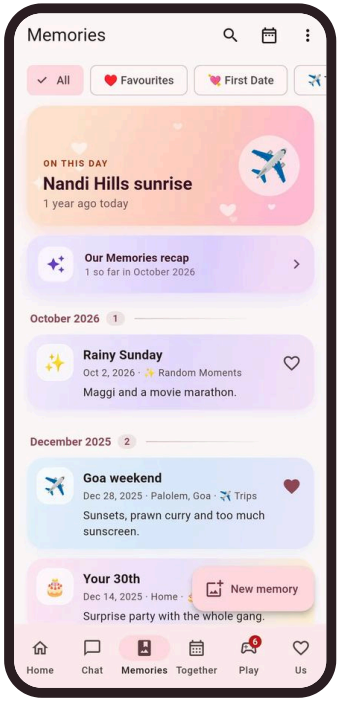

How to use it

1. Tap + to add a memory: up to 20 photos and videos, a title, caption, date, place and album.
2. Browse the timeline, filter by album or date, search, and mark favourites.
3. Open a recap for any month or year.

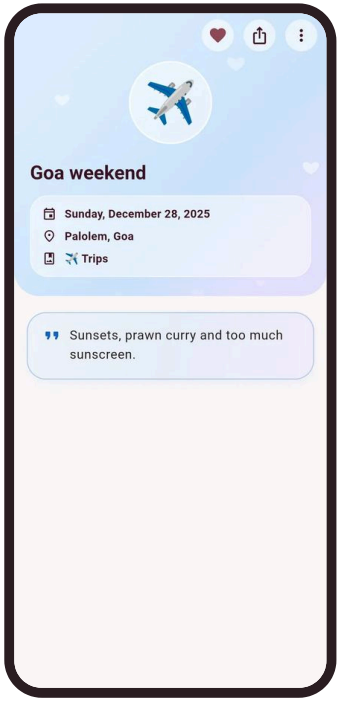

Good to know

- Either partner can edit; only the person who added a memory can delete it.

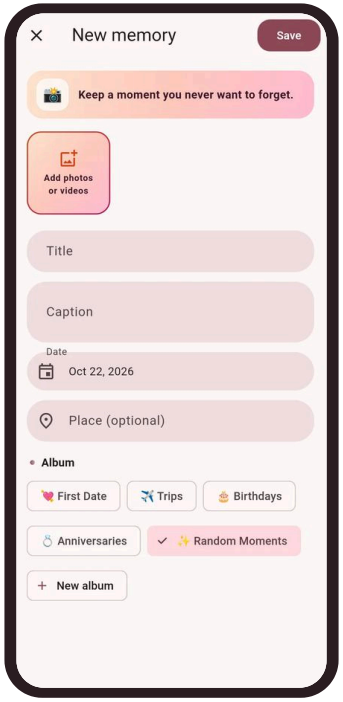

Behind the scenes: couples/{id}/memories; files in Storage.

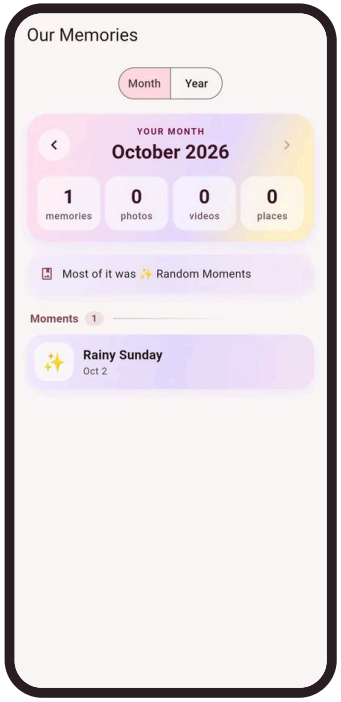

Memories

A memory

New memory

Recap

FEATURE 10

Calendar

📍 Together → Calendar

A shared calendar for date nights, trips, birthdays and anniversaries, with reminders.

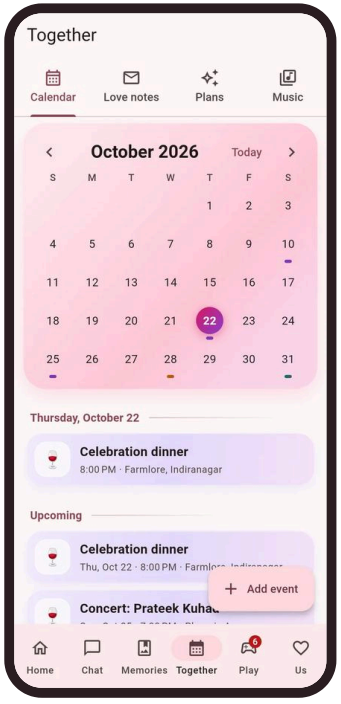

How to use it

1. Tap a day to see its plans, or + to add an event.
2. Pick a type, time, place, notes, budget, yearly repeat and a reminder.
3. Mark an event Private to keep it to yourself.

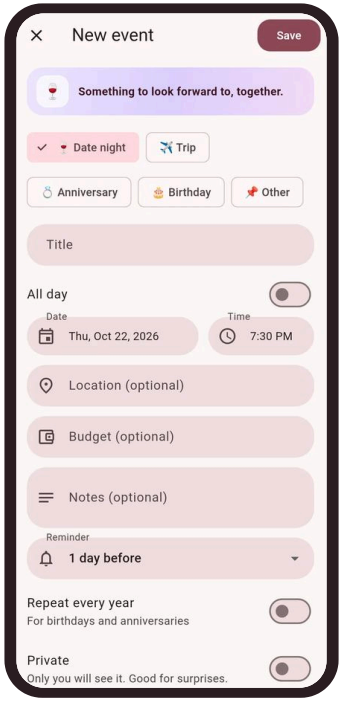

Good to know

- Your anniversary, both birthdays and the next meetup appear automatically.
- Reminders are local notifications planned 60 days ahead, respecting quiet hours.

Behind the scenes: couples/{id}/events; flutter_local_notifications.

Calendar

New event

FEATURE 11

Love notes

📍 Together → Love notes

Letters delivered now or on a chosen date, and “Open when…” envelopes for the hard and happy moments.

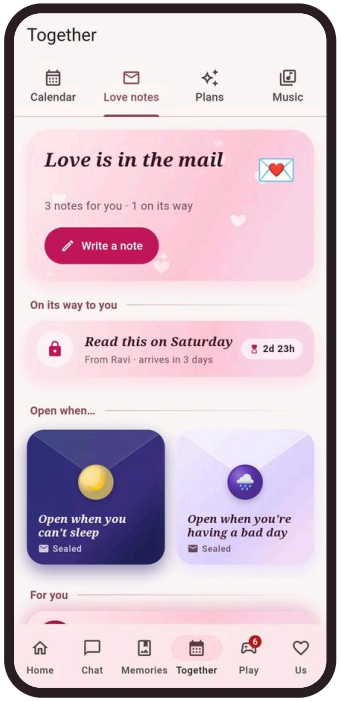

How to use it

1. Write a letter or an Open when… note (miss me, bad day, can't sleep…), optionally with a voice letter.
2. Choose send now or a delivery date and time.
3. Your partner sees a sealed envelope with a countdown until it arrives, then opens it.

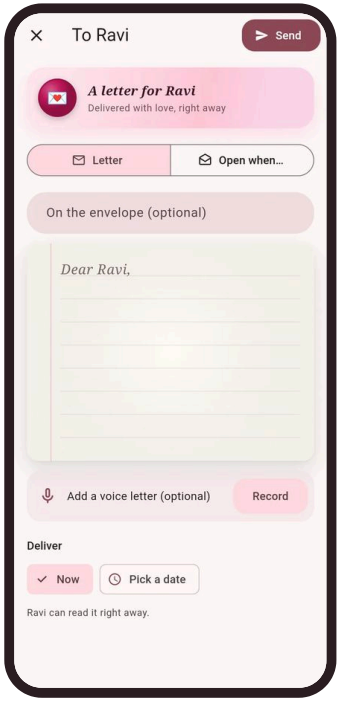

Good to know

- The words stay unreadable on the server until the delivery time.
- The sender can unsend.

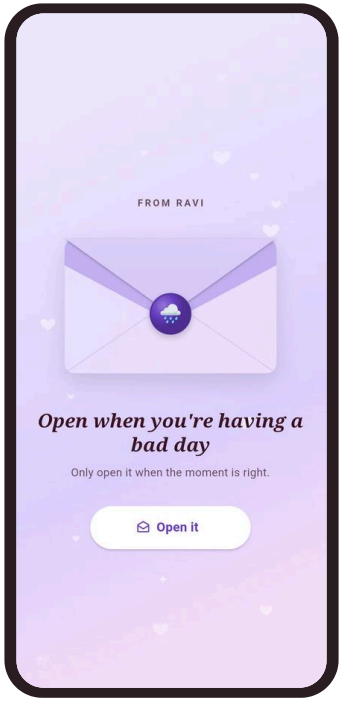

Behind the scenes: couples/{id}/notes, with the words in notes/{id}/sealed/content, which the rules hide until delivery.

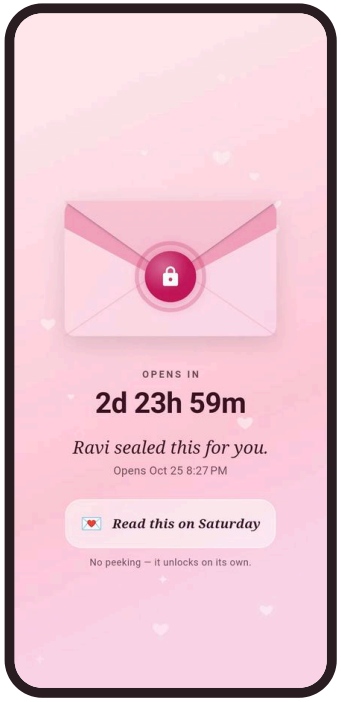

Love notes

Write a note

An envelope

Sealed note

FEATURE 12

Plans

📍 Together → Plans

Everything the couple plans together: date ideas, a bucket list, wishlists, places and shared expenses.

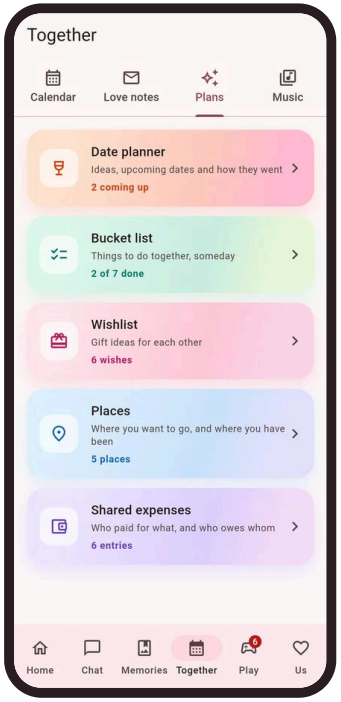

How to use it

1. Date planner: save ideas, plan one for a day, then mark it done with hearts and a note. “Surprise me” picks one.
2. Bucket list and Places: lists with categories, progress, ratings and Open in Maps.
3. Wishlist: claim your partner's wish secretly with “I'll get this”.
4. Shared expenses: add who paid and the split; Settle up records payments.

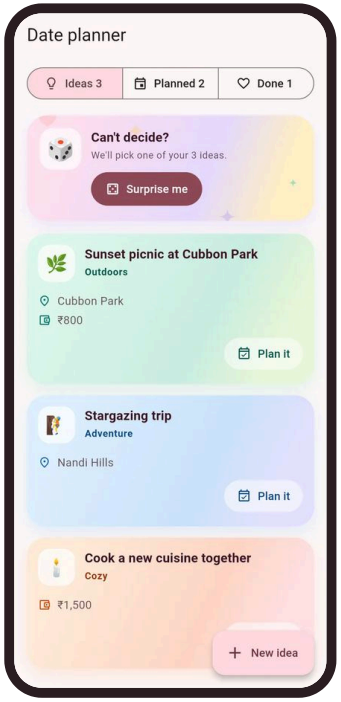

Good to know

- Wishlist claims are readable only by the person who made them.

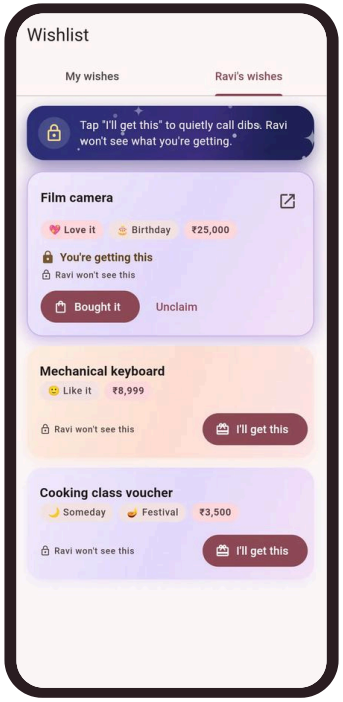

Behind the scenes: couples/{id}/datePlans, bucketList, wishlist (+ private wishlistClaims), places, expenses.

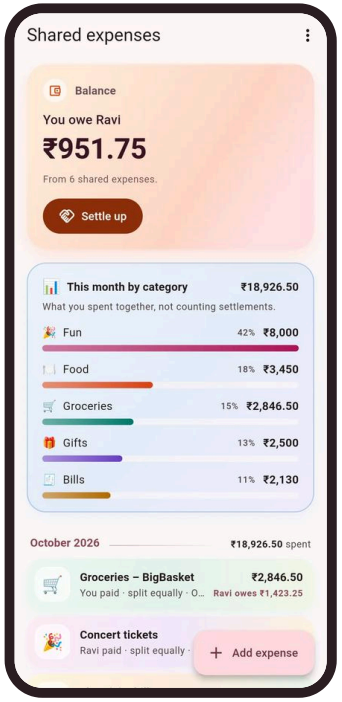

Plans

Partner's wishes

Shared expenses

FEATURE 13

Music and Watch together

📍 Together → Music (Songs / Videos)

Save your songs and YouTube videos as links, then listen or watch together in sync on both phones.

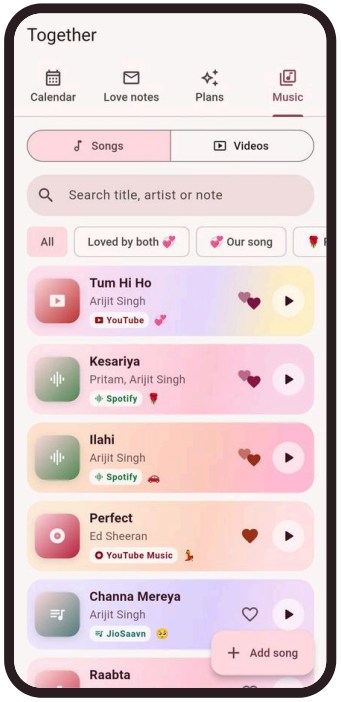

How to use it

1. Paste a link from Spotify, YouTube, Apple Music, JioSaavn or SoundCloud; title and cover fill in.
2. Tap ▶ — both phones count down and start together. YouTube plays inside the app, in sync.
3. Other apps (e.g. Spotify) open on both phones at the same moment.
4. A banner across the app lets your partner join.

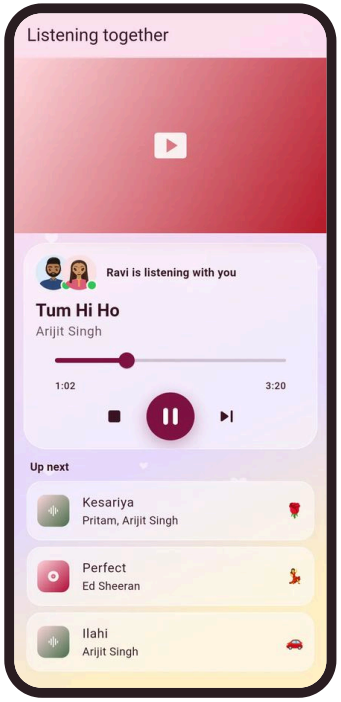

Good to know

- Netflix and Hotstar can't be played or controlled inside another app.

Behind the scenes: couples/{id}/songs, videos; listening/now and watching/now session docs.

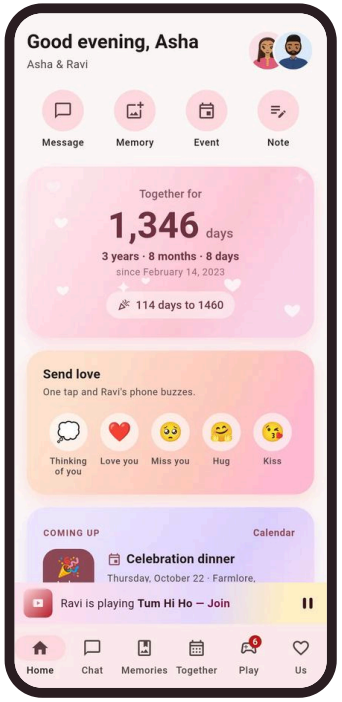

Your songs

Listening together

Watching together

Banner

FEATURE 14

Play

📍 Play tab

Live games for two, each on their own phone.

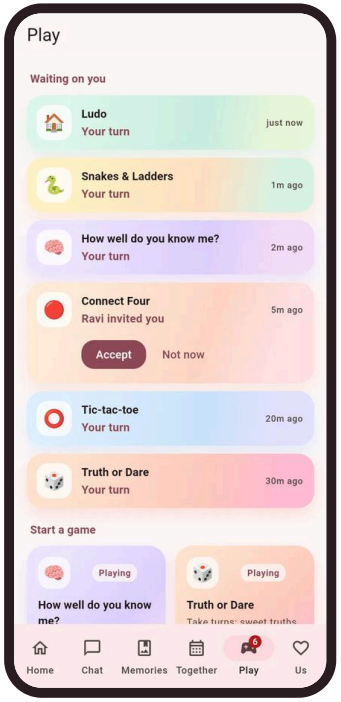

How to use it

1. Start a game from the hub; your partner gets an invite.
2. Take turns: Tic-tac-toe, Connect Four, Ludo, Snakes & Ladders, Truth or Dare, How well do you know me?
3. See whose turn it is, a head-to-head tally and recent results.

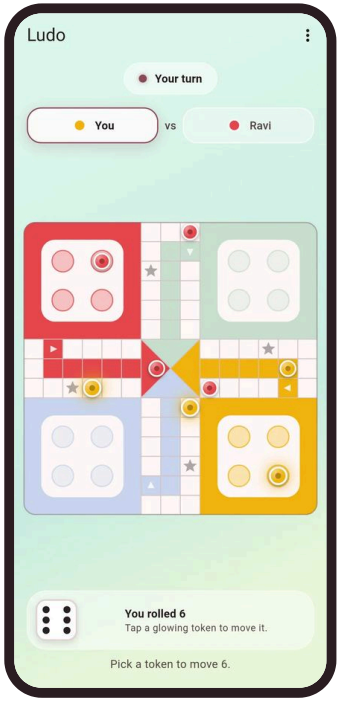

Good to know

- The Play tab shows a badge when a game is waiting on you.

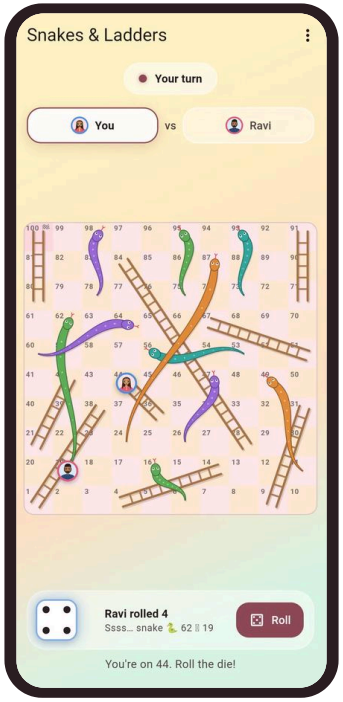

Behind the scenes: couples/{id}/games with turn checks in the rules.

Play

Ludo

Snakes & Ladders

FEATURE 15

Private vault

📍 Us → 🔒 Private

An end-to-end encrypted space for intimate photos and a private chat. Only the couple's approved phones can open it — not even the server can read it.

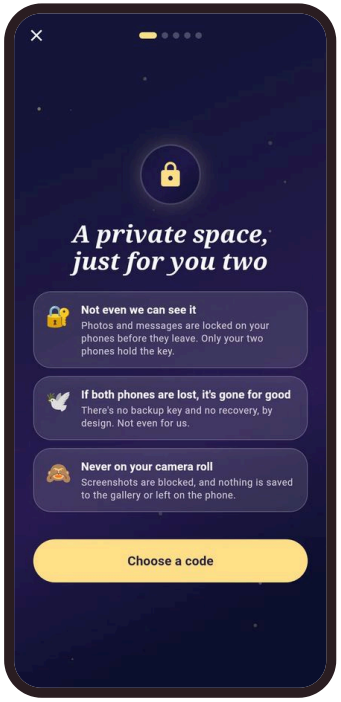

How to use it

1. Set up: choose one shared 6-digit code (and optionally a decoy code that opens a harmless second vault).
2. Unlock with the code, then fingerprint or face.
3. Add photos or messages as Keep, View once, or 24 hours.
4. A new phone must be approved from the partner's phone by comparing a safety code.

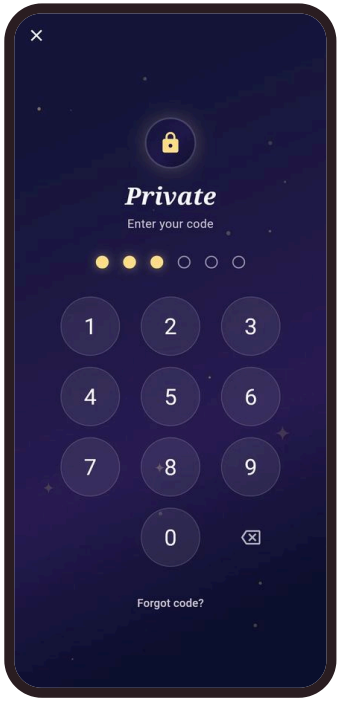

Good to know

- 18+ only.
- Screenshots blocked; auto-locks when you leave.
- If every approved phone is lost, the vault can't be recovered — by design.

Behind the scenes: X25519 + AES-GCM + Argon2id; couples/{id}/vault, vaultItems, vaultEvents.

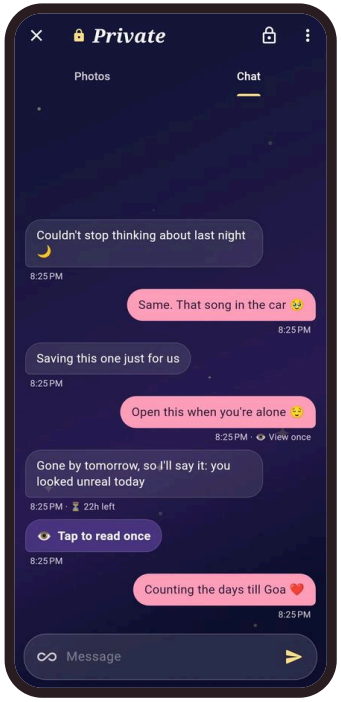

Set up

Unlock

Photos

Private chat

FEATURE 16

App lock and sign-in protection

📍 Us → App lock · Us → Sign-in protection

App lock asks for fingerprint, face or PIN to open the app. Sign-in protection stops someone who gets a recycled phone number from opening the account on a new phone.

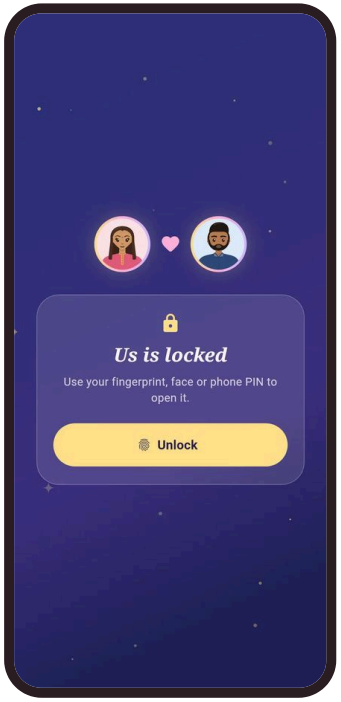

How to use it

1. App lock: turn it on and choose immediately or after 1, 5 or 15 minutes.
2. New phone: confirm through the partner (matching two-digit code), the account password or Google, or wait 7 days.
3. Your other phones show “It wasn't me” during the wait; you can pause new-phone sign-ins for 30 days.

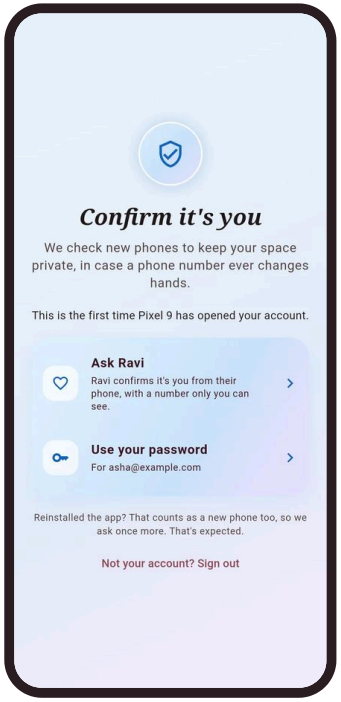

Good to know

- Trips to the camera, photo picker or Spotify don't lock the app.

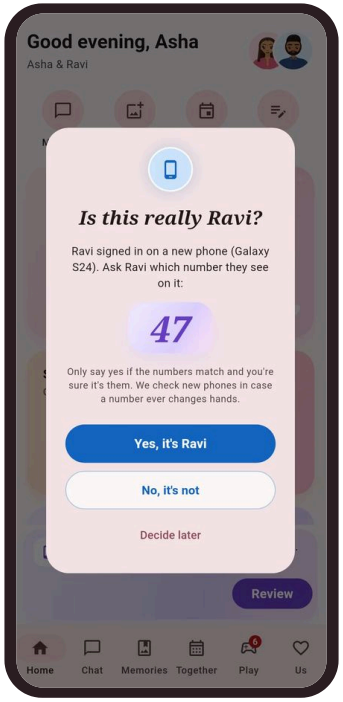

Behind the scenes: local_auth; users/{uid}/devices, securityEvents; couples/{id}/deviceChecks.

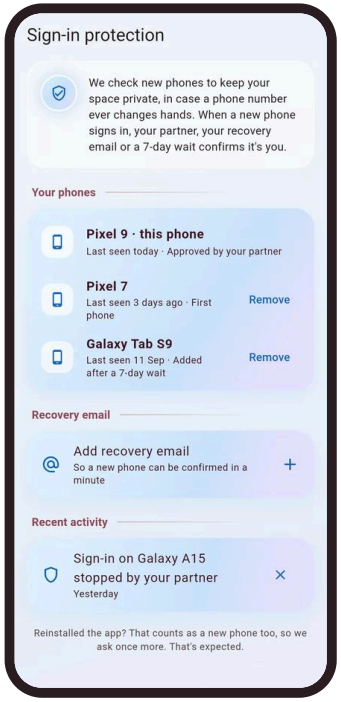

App locked

New phone

Partner approves

Security

FEATURE 17

Premium and gifts

📍 Us → Premium & books

One Premium plan covers both partners. Partners can gift each other Premium months or a Memory book.

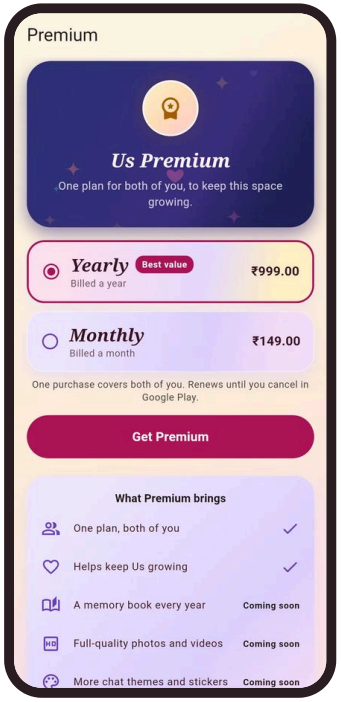

How to use it

1. Choose monthly or yearly and pay through Google Play.
2. Send a gift: 1, 3 or 12 months, or a Memory book, with a note.
3. Your partner unwraps it from Home or Us.

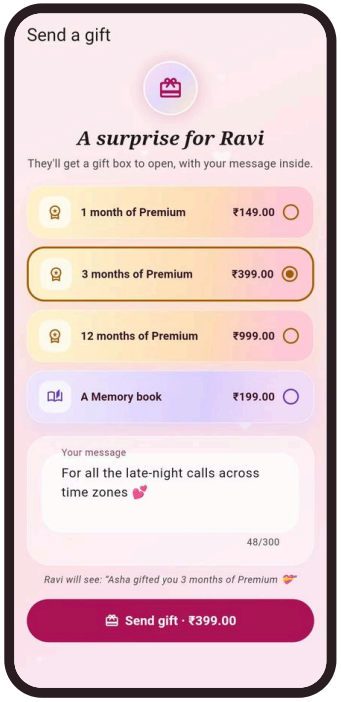

Good to know

- Purchases are verified on the server; until it's deployed they show “waiting for the server”.
- Month gifts are hidden while a subscription is active.

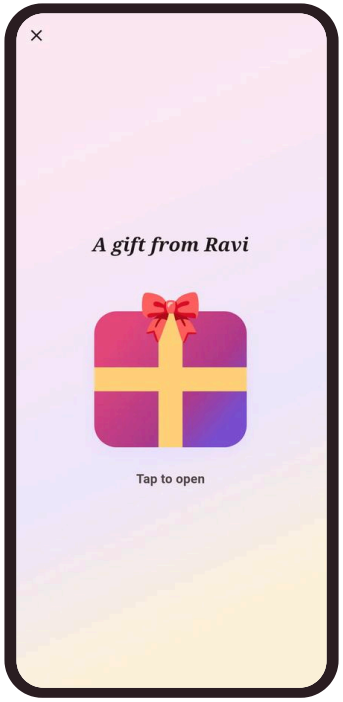

Behind the scenes: in_app_purchase; verifyPurchase callable + Play notifications; couples/{id}.premium, gifts.

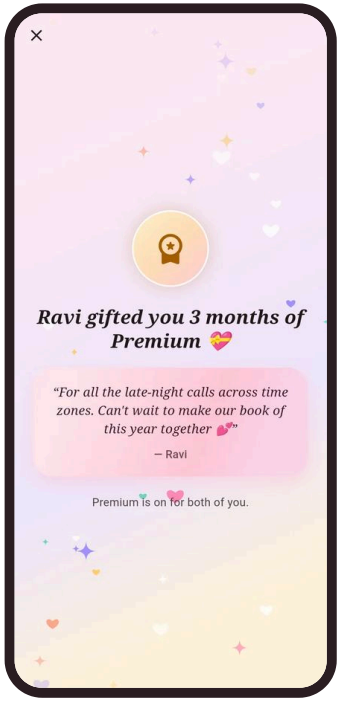

Premium

Send a gift

A wrapped gift

Gift opened

FEATURE 18

Memory book

📍 Us → Premium & books → Memory books

Turn a period of your relationship into a beautiful PDF book — one purchase per book.

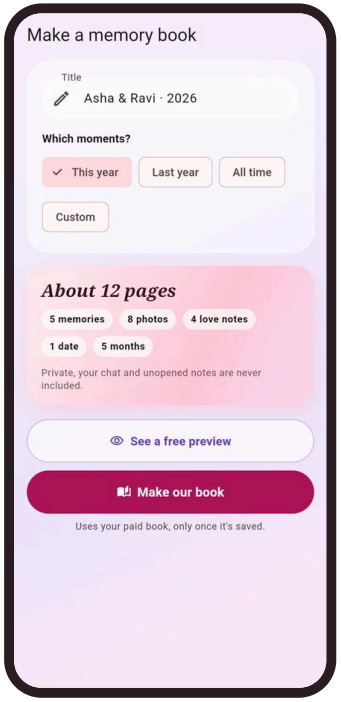

How to use it

1. Pick a date range (or all time) and what to include.
2. The phone builds the book: cover with your avatars, contents, a page per month, love notes, “Our numbers” and a closing page.
3. Read it in the app or share it; a free preview is watermarked.

Good to know

- Each book uses exactly one credit, checked by the rules.

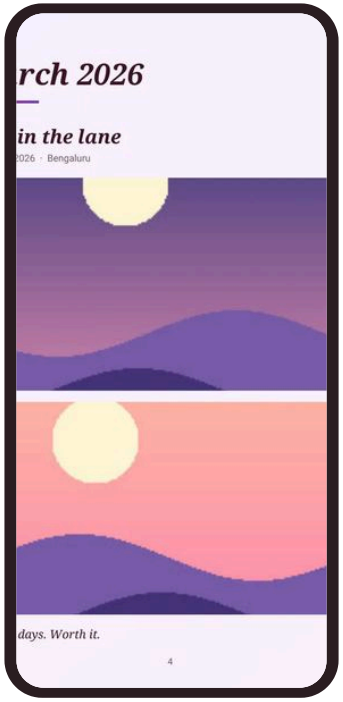

Behind the scenes: pdf package; couples/{id}/books and Storage books/{id}.pdf.

Make a book

Cover

Photos page

Our numbers

FEATURE 19

Ending a pairing

📍 Us → Our pairing

A kind, safe way to end a pairing. Everything shared is permanently deleted; both accounts stay and can pair again.

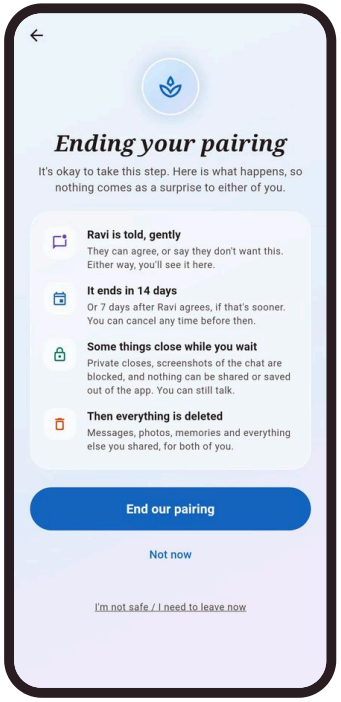

How to use it

1. Either partner asks (after app lock). It ends in 14 days, or 7 days after the other agrees, whichever is sooner.
2. The other partner can agree or decline, but can't block it; only the asker can cancel.
3. During the wait: banners with a countdown, an option to mute, and the vault closes.
4. Unsafe? "I need to leave now" ends it immediately (app lock + typing LEAVE).

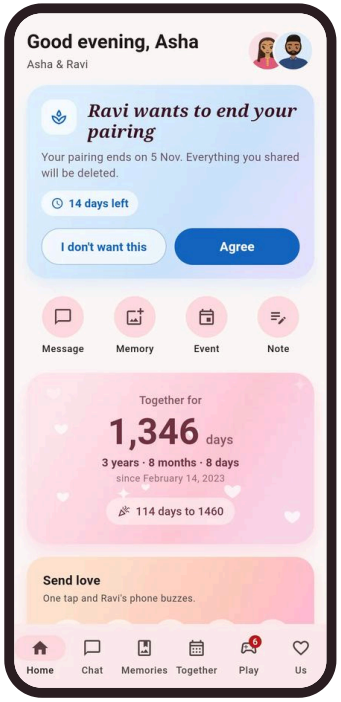

Good to know

- Deletion runs on the server (Cloud Functions), so it needs the Blaze plan.

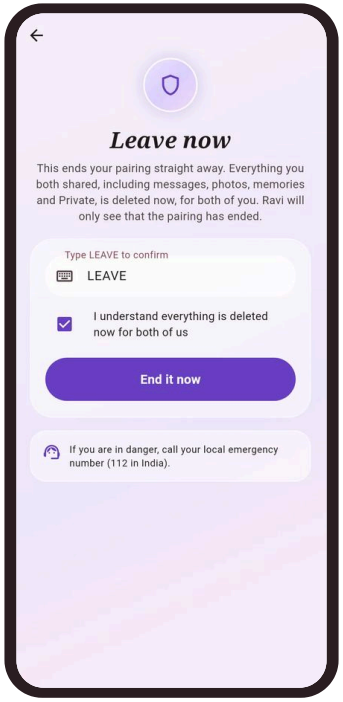

Behind the scenes: couples/{id}.separation; processSeparations, finalizeSeparation, leaveNow, endCouple.

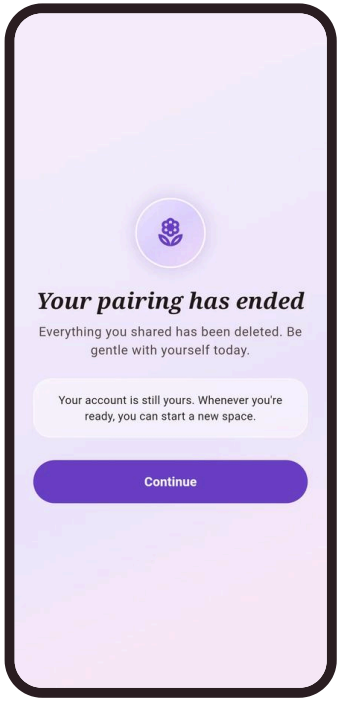

Ending explained

Partner's banner

Leave now

Pairing ended

FEATURE 20

Us: settings and your relationship

📍 Us tab

The couple's profile and every setting in one place.

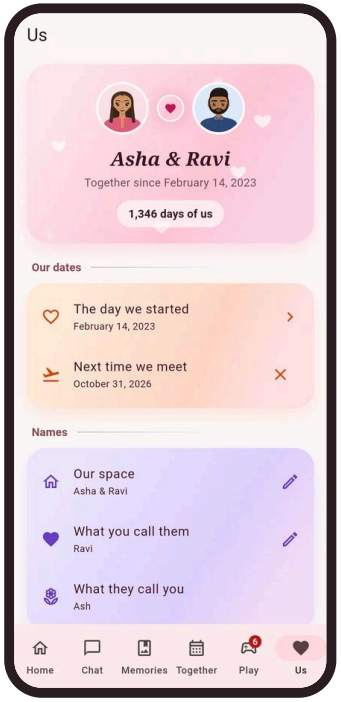

How to use it

1. Edit your dates and names (what you call each other).
2. Re-read answered daily questions.
3. Open Premium & books, Private, notifications, privacy, App lock, Sign-in protection and your invite code.

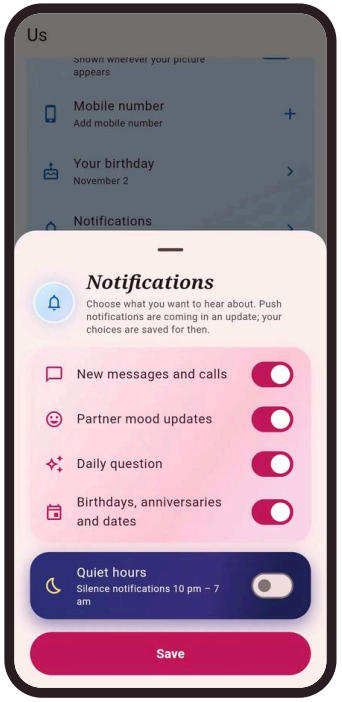

Good to know

- Notification settings include quiet hours.

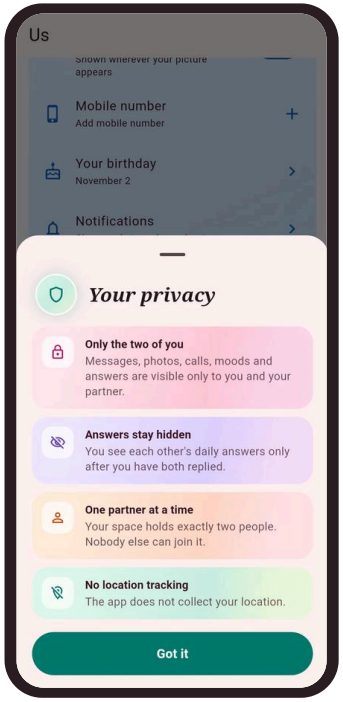

Behind the scenes: users/{uid} and couples/{id} settings.
